**CARBON FOOTPRINT TRACKING
FOR ORGANIZATION**

Measure

Track your organization's greenhouse gas emissions with Carbon Footprint Tracking for Organization (CFO) — a precise, modern tool that helps you plan effective reduction strategies while optimizing related costs such as electricity expenses and carbon taxes. Strengthen your organization's competitive edge with data-driven insights.

ลด

คาร์บอนด้วย

นวัตกรรมพลังงานสุดล้ำ

Reduce

Cut emissions and energy costs with advanced clean energy innovations, such as solar-plus-battery systems, blockchain-based peer-to-peer energy trading from solar rooftops, and District Cooling Systems.

Offset

Compensate for remaining emissions with carbon credits or Renewable Energy Certificates (RECs).

BCPG offers internationally certified I-REC renewable energy certificates, with up to **300,000 MWh** from solar and wind projects in Thailand, and **500,000 MWh** from hydropower projects in Laos. We also provide access to international carbon credits from Macau.

Start today, and build a carbon-neutral organization that's better for your business and the planet.
